SAPPADA • FORNI AVOLTRI

location

Sappada & Forni Avoltri are two charming mountain towns located on the extreme border of **Friuli Venezia Giulia**, near Veneto Region. They are framed by the spectacular Dolomites and offer its guests an atmosphere of other times that draws on the richness of history and culture, the splendor of nature and the unmistakable traditions, to present itself to its visitors with an irresistible charm!

The beauty of this land is all in its authenticity.

Here nature fascinates for its splendor; the air you can breathe leads back to history, to the past of a rural civilization that knew how to respect its land and take care of its peculiarities.

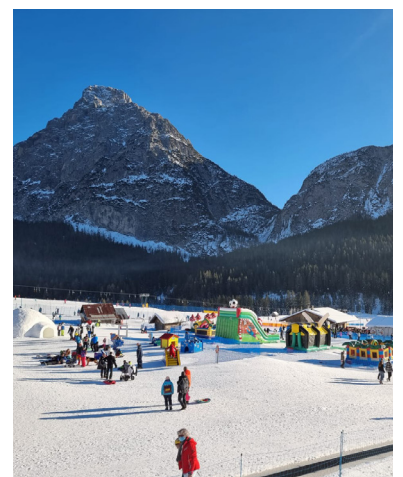

In Sappada rises the Piave, a sacred river to its homeland.

For all these reasons and many others here in Sappada and Forni Avoltri, the hospitality has a unique taste!

Sappada has one important world record in cross-country: is the town with more olympic medals related to the number of inhabitants! **Silvio Fauner, Pietro Pillitter** and **Lisa Vittozzi**, all coming from Sappada have won **10 olympic medals!**

That's one of the reason because the Master World Cup 2024, should be in our country.

The magic of Sappada and Forni Avoltri reaches its peak with the snow that covers it and enhances the beauty of the shapes and the landscape. A walk in the old street of Sappada, one of the most beautiful villages in Italy, where nativity scenes characterize every corner and glimpse of the villages or a ski mountaineering excursion in the silence of the night and illuminated by the moon and the light of the stars are just a few ideas to experience our land in an exclusive way. But Sappada and Forni Avoltri are not only magic and charm, but also sport and fun for adults and children. The alpine ski slopes, of all difficulties, are within everyone's reach: from the pitches for beginners to the black slope Col dei Mughì, guests can choose where to ski according to their abilities. You can decide to be kissed by the sun and go down the 2000 slope or, on the other side, have fun on the Monte Siera or Pian dei Nidi slopes. Those who prefer, can explore the slopes of the Dolomites with snowshoes and come across landscapes of rare beauty. The most reckless and motor lovers can board a snowmobile and travel by being caressed by the fresh and healthy air of the Sappada mountains. Even ice climbing lovers find a paradise in our valley: more and more guests from all over the world are climbing on our spectacular ice walls. Children and teenagers have fun as much as possible in the snow amusement park, one of the first in Europe, Nevelandia!

OUR KITCHEN

food

Sappada and Forni Avoltri have a unique talent: they conquer all their guests with gastronomy because here every dish has an exclusive, unrepeatable, unmistakable taste! Tourists can taste delicious cheeses made with the milk of the cows that graze at high altitude and local sausages in the characteristic shops of the town; or choose to indulge in a lunch or dinner in one of our many excellent **restaurants**, including one with a **Michelin star** and many of these dominate the ski slopes, offering the best of typical cuisine, interpreted by excellent chefs who are spokespersons.

One of the most characteristic aspects of the tradition and culture of the territory is the **Carnival**, of which the undiscussed king is the **Rollate**, an almost fairytale figure that every year, during the carnival period, comes to life in Sappada and animates the streets of the town making the sound of the its "rolls" and frightening the little ones with its grandeur and the austere expression of the wooden mask it wears. Then there is the **Pajaz**, a graceful figure who jumps through the streets of the town dressed in a colorful polka dot costume and a headdress that hangs up to her shoulders. The Carnival in Sappada and Forni Avoltri is a joyful and lively party, which finds its place on the 3 Sundays close to the pagan festival, in 3 different squares in the town and the protagonists are the costumes of the ancient peasant civilization and portrays its peculiarities.
